Aims and Scope. The JOURNAL OF PURE AND APPLIED ALGEBRA concentrates on that part of algebra likely to be of general mathematical interest: algebraic results with immediate applications, and the development of algebraic theories of sufficiently general relevance to allow for future applications.

Printed in The Netherlands

Instructions to Authors

Contributions should be in English and may be submitted (in duplicate) to any of the editors. No page charge is made. Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

The manuscript should be prepared for publication in accordance with the instructions given below:

1. The manuscript must be typed on one side of the paper in double spacing with wide margins. This format applies to all parts, e.g. also to references.
2. Papers submitted to the journal should include a short abstract and AMS classification codes.
3. References should be listed alphabetically and numbered consecutively, preferably in the same way as the following examples:
For a book: [1] P. Freyd, Abelian Categories, Harper & Row, New York, 1964.
For a paper in a journal: [2] A. Heller, Adjoint functors and bar constructions, Adv. in Math. 12 (1974) 8–31.
For a contribution to a contributed volume: [3] H. Kraft, Geometric methods in representation theory, in: M. Auslander and E. Lluís (Eds.), Representations of Algebras, Lecture Notes in Mathematics, Vol. 944, Springer, Berlin, 1982, pp. 180–258.
For an unpublished paper: [4] K. Rosenthal, Aspects of Étendue, Ph.D. Thesis, State University of New York at Buffalo, 1979. Citations in text should be by number, with name only at first occurrence.
4. The numbers identifying displayed mathematical expressions should be placed in parentheses at the right margin. Parts of text should not be subject to this numbering.
5. *LaTeX* files of papers that have been accepted for publication may be used by the Publisher. If the file is suitable, proofs will be produced without rekeying the text. The article should be encoded in Elsevier-LaTeX, standard LaTeX, or AMS-LaTeX (in document style ‘article’). The Elsevier LaTeX package (including detailed instructions for LaTeX preparation) can be obtained from Elsevier’s web site: www.elsevier.com/locate/latex, or from the Comprehensive TeX Archive Network (CTAN). To obtain the package from CTAN, use direct access via FTP at <ftp.dante.de> (Germany), <ftp.tex.ac.uk> (UK), or ctan.tug.org (Massachusetts, USA) and go to the directory [/tex-archive/macros/latex/contrib/supported/elsevier](http://tex-archive/macros/latex/contrib/supported/elsevier), or search for Elsevier with one of the CTAN search engines (<http://ctan.tug.org/CTANfind.html>, <http://www.tex.ac.uk/CTANfind.html> or <http://www.dante.de/cgi-bin/ctan-index>). CTAN is a mirrored network of <ftp.tex.ac.uk>, <ftp.dante.de> and ctan.tug.org, which are widely mirrored (see [ftp://ctan.tug.org/tex-archive/README.mirrors](http://ctan.tug.org/tex-archive/README.mirrors)) and hold up-to-date copies of all the public-domain versions of TeX, LaTeX, Metafont and ancillary programs. *No changes from the accepted version are permissible, without the explicit approval by the Editors. The Publisher reserves the right to decide whether to use the author’s file or not.*
6. For detailed instructions on the preparation of electronic artwork, consult the Author Gateway from Elsevier Science at <http://authors.elsevier.com>.

Authors’ benefits

1. 50 offprints per contribution free of charge.
2. 30% discount on all Elsevier Science books.
3. *Journal of Pure and Applied Algebra* has no page charges.

Other enquiries

Visit the Author Gateway from Elsevier Science (<http://authors.elsevier.com>) for the facility to track accepted articles and set up e-mail alerts to inform you of when an article’s status has changed. The Author Gateway also provides detailed artwork guidelines, copyright information, frequently asked questions and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided when an article is accepted for publication.

Papers submitted to *Journal of Pure and Applied Algebra* may also be posted on The Mathematics Preprint Server (<http://www.mathpreprints.com>). Posting on The Mathematics Preprint Server is in conformity with Elsevier Science copyright policy and in no way conflicts with submission to *Journal of Pure and Applied Algebra*.

Publication Information

Journal of Pure and Applied Algebra (ISSN 0022-4049). For 2003, volumes 177–185 are scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal’s website (<http://www.elsevier.com/locate/jpaa>). Further information on this journal and other Elsevier Science products is available through Elsevier’s website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

Orders, claims, product enquiries: please contact the Customer Support Department at the Regional Sales Office nearest to you:
